BENZAMA MUSA

Frontend Web Developer

07042195431 | *benzamasimon@gmail.com* | *benzama-dev.vercel.app*

PROFILE

I'm a frontend developer with 2+ years of experience building fast, responsive, and accessible web interfaces. I specialize in JavaScript (ES6+), TypeScript, and modern frameworks like VueJs, along with CSS3, Sass, and Tailwind to craft clean, user-focused designs.

I enjoy turning ideas into functional, pixel-perfect interfaces and collaborating with teams to bring products to life. Whether it's integrating APIs, optimizing performance, or creating reusable component systems, I focus on writing clean, maintainable code. Outside of development, I stay sharp by exploring new tools, contributing to open-source, and sharing knowledge through writing and personal projects.

WORK EXPERIENCE

INTERN

Greysoft Technologies

October 2023 - October 2024

- Assisted in building responsive user interfaces using HTML5, CSS3 (Sass/Tailwind) and modern JavaScript (ES6+).
- Collaborated with UX/UI designers to translate wireframes and mockups into pixel-perfect layouts.
- Integrated RESTful APIs and managed application state to fetch, display, and update data dynamically.
- Optimized page performance by lazy-loading assets, minimizing bundle size, and implementing efficient rendering patterns.
- Assisted in tutoring other Interns in related field.

EDUCATION

Redeemer's University

2025 - 2029

BSc Computer Science

SKILLS

- HTML5, CSS3 & JavaScript
- Advanced frontend frameworks(vueJS)
- Version control system (Git)
- Browser dev tools & Debugging
- State management(Pinia)
- SEO Optimization
